Talent Management Solutions (1/3)

Do your employees have the required skill for the role they are covering in your company?

1

Manage competencies

2

Organize company roles

3

Monitor users growth with built-in skill gap analysis

Talent Management solutions (2/3)

Forma Lms enables you to:

Create and manage

- list of skills,
- attitudes,
- knowledge or certifications

Manually assign
competencies to
users

Automatic
assignments
through roles

Talent Management Solutions (3/3)

1

Create and manage multiple roles

2

Define competencies needed by each role

3

Define a score and a validity time for each competencies / roles

4

Assign users to role

Integrated certificate system

Once you have finished a training course, Forma Lms enables you to download your certificate. Administrators can also completely manage them.

When a user completes a course, he/she can generate and download his/her certificate

Administrators can customize and manage certificates, which are tailored by course

Outstanding report system

Easily create **custom reports** for users and courses, and export them in excel or send them by email to specific users with a configurable scheduling system. You can also have a report for users related to learning objects.

You can customize rows, columns and displayed fields.

Native ecommerce functionalities, with e-commerce cart and PayPal® integration

Video Conferencing

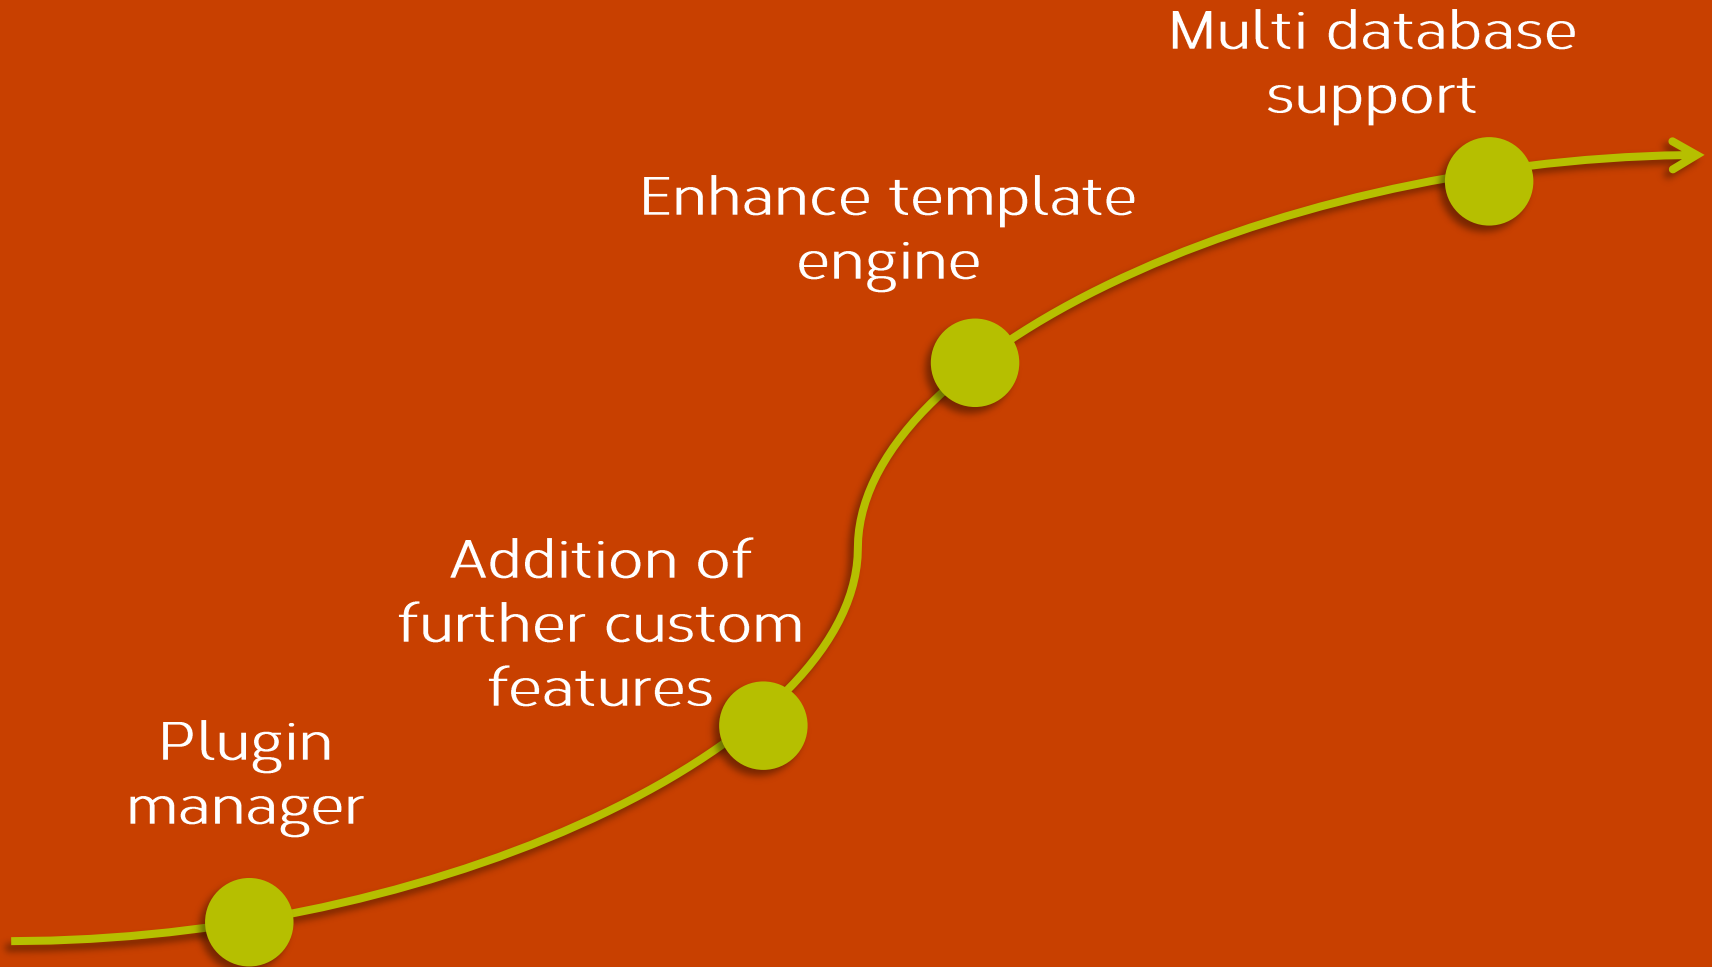

Forma Lms is already integrated with Adobe Connect, ® Teleskill ® and Big Blue Button ®. It's also open to integration with other conferencing systems

Forma Lms integration with Video Conferencing systems allows you to:

- Assign video conference meetings to courses
- Subscribe users to meetings
- Assign times and dates to meetings inside a course
- Single sign on between Forma Lms users and Video Conference users (no need for double login)

Forma Lms development has just begun. This is our roadmap:
for the near future:
